## CHANNEL LETTER HAND FINISHING TOOLS

PRECISION  
=  
REPUTATION

### 90 Deg Bending Tool

Used to bend sharp corners on channel letter returns, or bend small plates to use in corners for glueing and reinforcing joins.  
When fitting Trimcap material to sign faces, this tool can be used in conjunction with the Nipper Tool to form sharp, neat corners.

### EZ Acrylic Shaping Tool Set

Heated tongs consisting of sharp corner tong and radius tong.  
Suitable for shaping acrylic letter returns.  
Supplied with acrylic cutting tool.  
Form and stick acrylic return as you go.  
Can be used with NSI fast curing adhesive.  
Energy saving, no heating ovens or blow torches required.

1

### 90 Deg. Return Adjustment Plier

90 Deg aluminium letter return fine adjustment plier.  
Due to physical restrictions, channel letter benders can, in some instances, be unable to accurately bend radiuses in tight areas.  
This tool can be used for fine adjustment when fitting return to face.

2

### Straight Return Adjustment Plier

90 Deg aluminium letter return fine adjustment plier.  
Due to physical restrictions, channel letter benders can, in some instances, be unable to accurately bend radiuses in tight areas.  
This tool can be used for fine adjustment when fitting return to face.

### Hole Punch

When using screws to attach sign returns to backing boards, this time saving tool can be used to punch neat holes for fixing screws.

### Nipper Tool

When fitting Trimcap to sign faces, this tool is used to notch material for a neat precise 90 deg corner.  
To complete the operation the 90 deg bending tool should be used.,
